DEVOPS TRAINING ARCHITECT

CKA Exam Updates

The CKA exam periodically updates the version of Kubernetes it uses. Check **this video** to see which version is currently used by this course!

September 1, 2020 CKA Exam Updates

K8s Version 1.19

The exam now uses **version 1.19** of Kubernetes.

Topic Changes

The list of curriculum topics was **re-worked** somewhat.

2 Hours to Complete

The exam time limit was reduced to **two** hours (from three hours).

Less Security

The **Security** domain was removed. This topic is covered in the new **Certified Kubernetes Security Specialist (CKS)** cert.

Fewer Questions

The number of questions has **decreased**. Don't panic about the reduced time limit!

1.19

in this course

Lessons to Watch Out For

BUILDING A CLUSTER WITH KUBEADM

You will need to pay attention to which version you **initially install**.

UPGRADING K8S WITH KUBEADM

You will need to take note of which version you **upgrade to**.

Reach Out!

We always do our best to make sure all the content in this course works with the version of K8s used on the CKA exam.

But just in case you spot any issues, **don't hesitate to reach out!**
